

AVERAGE BIOLOGICAL OXYGEN DEMAND (“BOD”) VALUES RECORDED IN FY2019-FY2021

BOD Level	Limit (mg/l)	FY2019	FY2020	FY2021
Land Irrigation	20	13	11	16
Land Application				
Malaysian Operations	1000	89	142	113
Indonesian Operations	5000	453	696	1091*

* Prima palm oil mill's records were excluded in this reporting year as there was insufficient data available during commissioning periods

Remark: The Group's average BOD values were all below the stipulated limits, which were also the targeted values to be adhered to.

AVERAGE CHEMICAL OXYGEN DEMAND (“COD”) VALUES RECORDED IN FY2019-FY2021

Remark: The Group's COD values for all the processing plants in FY2021 were within the stipulated limits, but slightly above the Group's target of 1,500 mg/L. The higher average COD values were due to the desludging activities carried out at the waste water treatment plants in the Indonesian operations.
